Case Study Briefing — The Wong Family Legacy

Workshop: How to Prepare an Outstanding Financial Planning Proposal

Prof. Raymond Chan, DBA, CPA, CMA

19 September 2026 · FellowSPACE HK, Wong Chuk Hang

Trainer's Biography

Prof. Raymond Chan, DBA, CPA, CMA

DBA, MABR, MBA, BSc(Eng), CPA(Aust.), CMA(Aust.), FIPA, FFA, FHKSI, FHKCS, FSRFP&S, FCESGS, CFT, HKICPA-IA

- Vice President of a global crypto exchange
- Book Author 新金融啟示錄 series
- Director and Chief Fintech Advisor, Society of Registered Financial Planners & Strategists
- Chairman, Greater Bay Area FinTech League
- Vice Chairman, Institute of Financial Technologists of Asia
- Vice Chairman, Hong Kong Digital Finance Association
- Vice Chairman, Greater China Financial Professionals Association
- Visiting Professor of Guangzhou Huashang College
- Part-time Lecturer, HKUST, HKU SPACE
- Former CEO & Director, an online securities broker and an online fund platform

Today's hour: from competition rules to a winning proposal plan

1	Competition essentials	Format, rules, timeline and how judging works	5 min
2	Meet the Wong family	Who they are, what they own, what they worry about	10 min
3	Reading the financials	Balance sheet, cash flow, protection and goals	15 min
4	Your mandate	The 11 required sections and the questions behind them	20 min
5	Tips, dates and Q&A	What judges reward, hard rules and next steps	10 min

COMPETITION ESSENTIALS

The award in brief: teams of 3–4, three rounds, and a workshop you must attend

Team format

3–4 full-time undergraduates, all from the same university; each student may join one team only.

Workshop is mandatory

At least one member must attend today's workshop (Macau teams excepted) — otherwise the team is disqualified.

Three rounds

Written proposal → 10-minute video presentation → live final on a topical issue, with Q&A.

Prizes and recognition

Champion HK\$6,000 plus trophies; runners-up HK\$3,000–5,000; finalists receive 2-year SRFP&S student membership.

COMPETITION ESSENTIALS

Eight dates govern your autumn — Round One is due two weeks after today

Date (2026)	Milestone
11 Aug – 11 Sep	Registration period for undergraduate teams
19 Sep (Sat)	Financial planning workshop — today
2 Oct (Fri), 23:59	Round One proposal submission deadline
16 Oct (Fri)	Round One results announced — 12 teams
26 Oct (Mon), 17:00	Round Two deadline — video presentation plus slides
2 Nov (Mon)	Round Two results announced — 8 teams
11 Nov (Wed), 23:59	Final Round slide deadline — 4 teams
21 Nov (Sat)	Final Round and Award Ceremony, FellowSPACE HK

Who can enter, and the ground rules every team must follow

Who can enter

- Full-time undergraduates from 11 Hong Kong universities, plus the University of Macau
- Teams of 3–4, all from the same university
- Each student may join one team only
- Registration: 11 August – 11 September 2026

Ground rules

- Proposals and presentations are in English
- Round One: ≤15 single-sided pages, 12-pt Times New Roman
- Anonymous judging — no university names in submissions or team names
- Workshop attendance is mandatory (Macau teams excepted)

COMPETITION ESSENTIALS

Round One scoring rewards the proposal itself — and how clearly it is written

Round One criteria (points out of 100)

Round One: written proposal in English, no more than 15 pages, 12-pt Times New Roman.

Round Two: 10-minute video plus slides; combined score = $0.5 \times R1 + 0.5 \times R2$.

Final Round: 10-minute topical presentation plus Q&A — the final score carries 70% weight.

COMPETITION ESSENTIALS

After Round One: a video round, then a live final where innovation counts 40%

Round Two · 8 teams

- 10-minute video presentation in English, plus slides, due 26 Oct, 17:00
- Scoring: communication 45, proposal delivery 20, personal statement 15, slides 15, charisma 5
- Ranking: $0.5 \times \text{Round One} + 0.5 \times \text{Round Two}$

Final Round · 4 teams

- 10-minute live presentation on a topical issue, plus 10 minutes of judges' Q&A
- Scoring: innovation and independent thinking 40, knowledge 20, logic 20, presentation 20
- Ranking: $0.15 \times R1 + 0.15 \times R2 + 0.7 \times \text{Final}$

PART 2 · THE CASE STUDY

The Wong Family Legacy

Balancing retirement, education, ESG integration and digital asset exposure

THE CASE STUDY

Four family members, four different perspectives on money and risk

Adrian Wong · 54

Regional Operations Director, logistics tech.
Prudent; values capital preservation.

Risk: Low–Medium

Carmen Wong · 49

Co-founder and MD of a sustainable packaging business. ESG advocate.

Risk: Medium–High

Ryan Wong · 24

Data analyst at a virtual insurer. Holds BTC, ETH and VA spot ETFs (HK\$500K).

Risk: High

Chloe Wong · 16

Secondary student considering business, psychology or design, in HK or overseas.

Education funding need

THE CASE STUDY

The Wong family in six numbers: affluent, liquid, and asset-heavy

HK\$24.4M

Estimated net worth of the family

HK\$2.22–2.37M

Annual household cash inflow

HK\$82K

Average monthly household expenses

HK\$11.5M

Tai Kok Tsui home;
HK\$1.8M mortgage left

HK\$10.5M

Liquid plus investment assets combined

HK\$500K

Digital assets held by Ryan

READING THE FINANCIALS

Three earners bring in HK\$2.2–2.4M a year against HK\$82K a month

Annual income source	HK\$
Adrian — salary	1,050,000
Adrian — discretionary bonus	150,000–300,000
Carmen — salary and dividends	720,000
Ryan — salary	300,000

Monthly expenses ≈ HK\$82,000: mortgage, utilities, transport, leisure and travel, Chloe's tuition, medical premiums and support for elderly parents.

Read between the lines

- Part of Adrian's income is variable
- Profits tax on Carmen's business is excluded
- One-off costs — overseas travel, medical events, renovation — sit outside the HK\$82K

READING THE FINANCIALS

Wealth of HK\$27.2M is concentrated in property and Carmen’s business

Total assets HK\$27.19M, by category

Liabilities and net worth (HK\$M)

Total assets	27.19
Total liabilities	(2.79)
Net worth	24.41

- Debts: mortgage 1.8M, business loan 0.9M, cards 0.09M
- Leverage is modest — about 10% of assets
- 61% of assets sit in the home and the business

READING THE FINANCIALS

HK\$7.97M of investments already spans funds, MPF, ESG and digital assets

Investment assets	HK\$
Hong Kong equity funds	1,000,000
Global equity funds	1,350,000
Investment-grade bond funds	900,000
ESG / sustainable equity funds	700,000
Green / sustainable bonds	450,000
Listed stocks and REITs	800,000
MPF — Adrian / Carmen / Ryan	1,850,000
Digital assets (BTC, ETH, ETFs, MMF)	500,000
Cash value of life policies	420,000
Total investment assets	7,970,000
Liquid assets (deposits, MMF)	2,500,000
Investable pool	10,470,000

Starting points

- ESG holdings today: HK\$1.15M — about 11% of the investable pool, vs a 20–25% goal
- Digital assets: about 6% of investment assets

READING THE FINANCIALS

A ~55% savings rate gives the family real planning firepower

Annual cash flow, HK\$ millions (midpoints)

- Income ranges HK\$2.22–2.37M; expenses run $\approx$ HK\$984K a year ($\text{HK\$82K} \times 12$)
- Estimated surplus HK\$1.24–1.39M — a savings rate above 55%
- Liquid assets of HK\$2.5M cover roughly 30 months of spending
- Watch: bonus variability, plus profits tax and one-off costs are excluded from the HK\$82K

Protection looks thin once you look past the two whole-life policies

What is in place

- Whole life: Adrian HK\$2.0M, Carmen HK\$1.8M (cash value $\approx$ HK\$210K each)
- Group medical via both employers
- Home and motor insurance
- MPF: Adrian 1.05M, Carmen 0.62M, Ryan 0.18M

Gaps to address

- No disability income protection for either parent
- Ryan has no personal life, critical-illness or medical cover
- Post-retirement medical adequacy uncertain
- No wills, trusts, powers of attorney or advance directives
- No key-person or business continuity cover for Carmen

THE CASE STUDY

Eight stated concerns — your proposal should answer every one of them

- | | |
|---|---|
| 1 Is the couple on track to retire at their desired ages? | 2 How to fund Chloe's university education, local or overseas? |
| 3 Is the digital asset exposure appropriate, and how to manage it? | 4 How to integrate ESG credibly into the investment strategy? |
| 5 Is insurance sufficient for death, illness, disability, business disruption? | 6 How to manage intergenerational wealth transfer responsibly? |
| 7 Should Carmen restructure or monetize her business interest? | 8 Keep the Tai Kok Tsui home, downsize, or relocate in retirement? |

THE CASE STUDY

The family's eight goals come with concrete targets you can plan to

Goal	Target set by the family
Retirement	Adrian at 65, Carmen at 62; HK\$780K a year in today's terms
Education	Chloe — HK\$150–250K local vs HK\$350–600K overseas per year
Ryan	Build his own saving, investment and protection discipline
Portfolio	Rationalize holdings; disciplined allocation and rebalancing
ESG	Align 20–25% of investable assets, with proper due diligence
Digital assets	Decide the form, size and risk-controlled structure
Protection	Close life, medical, critical-illness and disability gaps
Legacy	Wills, trusts, powers of attorney and philanthropy

THE CASE STUDY

Market context: Hong Kong is leaning into sustainable finance and digital assets

Tailwinds to harness

- Growing ESG and sustainable investment shelf
- Green bonds and sustainability-linked products
- Tokenized securities and regulated virtual asset spot ETFs
- Retirement solutions balancing stability, inflation protection and growth

Headwinds to manage

- Geopolitical tension and technology disruption
- Inflation and interest-rate swings
- Longevity risk and medical inflation
- Valuation volatility across traditional and digital assets
- Greenwashing and digital asset suitability concerns

PART 4 · YOUR MANDATE

The Required Proposal

A comprehensive financial plan for the Wong family, in 11 required sections

YOUR MANDATE

Eleven required sections — treat them as your table of contents

- | | |
|-------------------------------------|---|
| 01 Executive summary | 07 Digital asset recommendation |
| 02 Cash flow and net worth | 08 Risk management and protection |
| 03 Retirement planning | 09 Property, succession and legacy |
| 04 Education planning | 10 Implementation roadmap |
| 05 Investment and allocation | 11 Risk and compliance |
| 06 ESG integration framework | |

Maximum 15 pages — every section must earn its place on the page.

Retirement: roughly a decade to build a 25-year income stream

11–13 years until Adrian (65) and Carmen (62) retire

HK\$780K a year target spending, in today's dollars

Life expectancy 84 / 89 (M/F) — plan to at least age 89

HK\$1.67M MPF combined for Adrian and Carmen today

What a strong answer covers

- Accumulation strategy for the remaining working years
- Drawdown and liquidity strategy across a 25-plus-year retirement
- Stated assumptions: inflation, medical inflation, returns
- Role of MPF, the property and Carmen's business value
- Sensitivity testing if returns disappoint or inflation bites

YOUR MANDATE · FOCUS AREAS

Education: fund a four-year degree without knowing where Chloe will land

SCENARIO A · LOCAL UNIVERSITY

HK\$150–250K a year

≈ HK\$0.6–1.0M for a four-year degree

SCENARIO B · OVERSEAS UNIVERSITY

HK\$350–600K a year

≈ HK\$1.4–2.4M for a four-year degree

- **Timing:** Chloe is 16 — the first tuition payment is roughly two years away
- **Flexibility:** she may choose Hong Kong, the UK, Canada or Singapore; business, psychology or design
- **Funding:** decide which assets fund the degree, in what order, with what contingency
- **Risks:** education inflation, currency moves, and avoiding excessive debt

Portfolio: bring discipline, credible ESG, and a firm cap on digital assets

Portfolio discipline

- HK\$10.5M across deposits, funds, stocks, REITs, MPF and digital assets
- Set a target allocation for moderate growth with controlled downside
- Define monitoring and rebalancing rules

ESG: target 20–25%

- Define the strategic role of ESG in the portfolio
- Set product selection criteria and due diligence steps
- Address benefits, limitations and greenwashing risk

Digital assets: ~6% today

- Assess suitability, volatility and downside risk
- Address regulation, platform, custody and security
- Set allocation limits and prudent vehicles, e.g. VA spot ETFs

YOUR MANDATE · FOCUS AREAS

ESG: lift credible exposure from ~11% to the family's 20–25% target

ESG-aligned assets, HK\$M (investable pool 10.47M)

What the case asks you to cover

- Strategic role of ESG investments in the portfolio
- Product selection criteria and due diligence
- Benefits and limitations of ESG approaches
- Concrete methods to mitigate greenwashing risk

Digital assets: define the form, size and controls — not just yes or no

The situation today

- HK\$500K held by Ryan: BTC, ETH, virtual asset spot ETFs and tokenized money-market funds
- Ryan is optimistic on Web3; Adrian is skeptical; Carmen is open but cautious
- Family objective: moderate growth with controlled downside

Six questions to answer

- Suitability for each family member
- Volatility and downside risk
- Regulation and platform risk
- Custody and security arrangements
- Appropriate allocation limits
- Prudent implementation options

Protection, property and legacy: turn gaps into a sequenced action plan

Protection planning

Close disability-income and critical-illness gaps; add key-person cover for Carmen's business; start Ryan's own protection early.

Property decision

Retain, refinance, partially monetize or downsize a HK\$11.5M home with only HK\$1.8M of mortgage left.

Succession and legacy

Wills, trust structures, powers of attorney and family governance; philanthropy in education or environmental causes.

Implementation roadmap

Sequence actions into the next 12 months, the next 3–5 years, and the long-term retirement and legacy stages.

Close the plan with a roadmap — and an honest account of its risks

Next 12 months

Immediate actions —
protection gaps, wills,
emergency reserves

Next 3–5 years

Education funding,
rebalancing, business
review

Long term

Retirement drawdown,
property decision and
legacy stages

Section 11 · Risk and compliance — name these explicitly

- Suitability and behavioral risks — e.g. divergent risk appetites within one household
- Product, regulatory and market risks attached to each recommendation
- Ethical duties: transparency, justified assumptions, and contingency planning

WINNING APPROACH

Fifteen pages, eleven sections: budget your space before you write

Section	Suggested pages
1. Executive summary	1
2. Cash flow and net worth	1.5
3. Retirement planning	2
4. Education planning	1
5. Investment and allocation	2
6–7. ESG and digital assets	2
8. Protection planning	1.5
9. Property, succession, legacy	1.5
10–11. Roadmap, risk, compliance	1.5
Cover, charts and appendices	within 15

Executive summary

- One page that states the family's position, key issues and your strategic direction
- Write it last — it decides the judge's first impression

WINNING APPROACH

What separates a winning proposal: completeness, numbers and discipline

What judges reward

- Use every fact in the case — numbers, ages, preferences
- Quantified recommendations built on stated assumptions
- Advice tailored to each member's risk profile
- All 11 sections covered, with clear priorities
- Innovative ideas that remain implementable

Hard rules to respect

English only; ≤15 single-sided pages, 12-pt Times New Roman

Use Hong Kong dollars throughout

State and justify every assumption you make

Never reveal your university name — judging is anonymous

NEXT STEPS
